High Sensitivity & High Speed TDI Line Scan Cameras

VTDI

- Next generation hybrid TDI line scan technology
- Up to 250 kHz at 9k resolution and 100 kHz at 23k resolution
- Greater sensitivity at faster speed with very low noise

VT Series – High Sensitivity TDI Line Scan Cameras

Overview

VT series, Viewworks' Time Delayed Integration line scan cameras, is designed for applications where faster line rates and higher sensitivity are crucial.

Viewworks' advanced TDI line scan technology based on the outstanding hybrid imaging sensors allows image captures as fast as 250 kHz line rates with up to 128× higher sensitivity using the M72 mount based VT-9K7X camera.

Even superior resolution and sensitivity, up to 23360 pixel resolution at 100 kHz line rate and 256× greater sensitivity can be achieved using the M95 mount based VT-23K3.5X camera.

A diverse lineup of VT TDI line scan cameras is now available at reasonable prices to meet various system design requirements including resolution, line rate, sensitivity and lens mount (M42/M72/M95) specifications.

VT series is available with Camera Link or the latest CoaXPress interface standard to meet application-specific requirements.

Featured with high speed and high sensitivity, this brand new technology is ideal for demanding applications such as flat panel display inspection, wafer inspection, printed circuit board inspection, and high-performance document scanning.
